NVCC COLLEGE-WIDE COURSE CONTENT SUMMARY
WEL 126 - PIPE WELDING I (3 CR.)

Course Description
Teaches metal arc welding processes including the welding of pressure piping in the horizontal, vertical, and horizontal fixed positions in accordance with Section IX of the ASME Code. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

General Course Purpose
WEL 126 is a basic course in pipe welding, where the student will learn basic theory and practical application in accordance with Section IX of the ASME Code. The experienced welder, interested in learning to weld pipe, will find WEL 126 educational.

Course Prerequisites/Co-requisites
The prerequisite is WEL 122 Welding II (Electric Arc) or division approval

Course Objectives
Upon completion of this course the student will be able to:

- demonstrate proficient knowledge of preparation and set-up of pipe spools
- demonstrate their technique of welding in the 2G and 5G positions
- demonstrate their knowledge of the Qualification Test requirements
- demonstrate their knowledge of safety and set-up in the lab areas at all times

Major Topics to be Included
- Introduction to pipe welding and fitting, preparation of stock and set-up
- ASME Code and Qualification Test requirements
- Welding pipe in the 2G position
- Welding pipe in the 5G position

EXTRA TOPICS (optional)
- Welding pipe with the oxyacetylene, M.I.G., and T.I.G. processes
- Qualification testing for certification
