

## ENGINEERING

Associate of Science Degree

AN

*Purpose:* The curriculum is designed to prepare the student to transfer into a baccalaureate degree program in engineering fields such as mechanical engineering, civil engineering, chemical engineering, aeronautical engineering, and naval architecture/marine engineering.

*Transfer Information:* Students are advised to work closely with the faculty and counseling staff for program and course scheduling. Electives should be chosen carefully to meet requirements of transfer institution. The responsibility for proper course selection rests with the student.

*Recommended Preparation:* High school courses: 4 units of English, 2 units of algebra, 1 unit of geometry, 1 unit of trigonometry, 1 unit of laboratory science (chemistry or physics).

*Completion Requirements:* Grades of C and above are required in courses intended to be transferred for credit to a baccalaureate degree-granting college/university.
