CHAPTER THREE

Digestion

Mouth:

Mastication:

Tongue:

Saliva:

7 functions:

Esophagus:

Cardiac sphincter:

Substances that cause the cardiac sphincter to relax (Reflux):

Stomach:

What is digested in the stomach?

What protects the stomach walls from being digested?
Pyloric sphincter:

Small Intestine:

Digestive juices:

Illeocecal valve:

Large Intestine:

Anus:

Absorption
Definition:

Anatomy of small intestine:

Transport:

Regulation of digestion & absorption
Endocrine or hormonal regulation:

Gastrin:

Secretin:
Regulation of the amounts of pancreatic digestive enzymes:

CCK:

CHAPTER THREE QUESTIONS
