

College Steps is a nonprofit that has partnered with NOVA since 2015. College Steps provides customized college support for students with learning and social challenges such as learning disabilities, autism, and executive functioning deficits. College Steps is currently available at the **NOVA Loudoun, Annandale, and Alexandria** campuses.

WHAT WE DO

College Steps provides personalized college support for students with learning and social challenges. Our student-centered support utilizes peer mentoring and multidisciplinary collaboration on campus.

HOW WE WORK

Our structured educational support model emphasizes thorough planning and thoughtful action. Along with our expert team, NOVA's student mentors are at the center of our approach.

College Steps' model is founded on a holistic, student-centered approach to learning. Our model enables a personalized experience that engages our team, the student, the family and the community support network to identify areas of strength, need and customized support for success in post-secondary life

College Steps utilizes a model of personalized support for a neurodiverse population of learners within the post-secondary education environment, including students living with learning and social challenges.

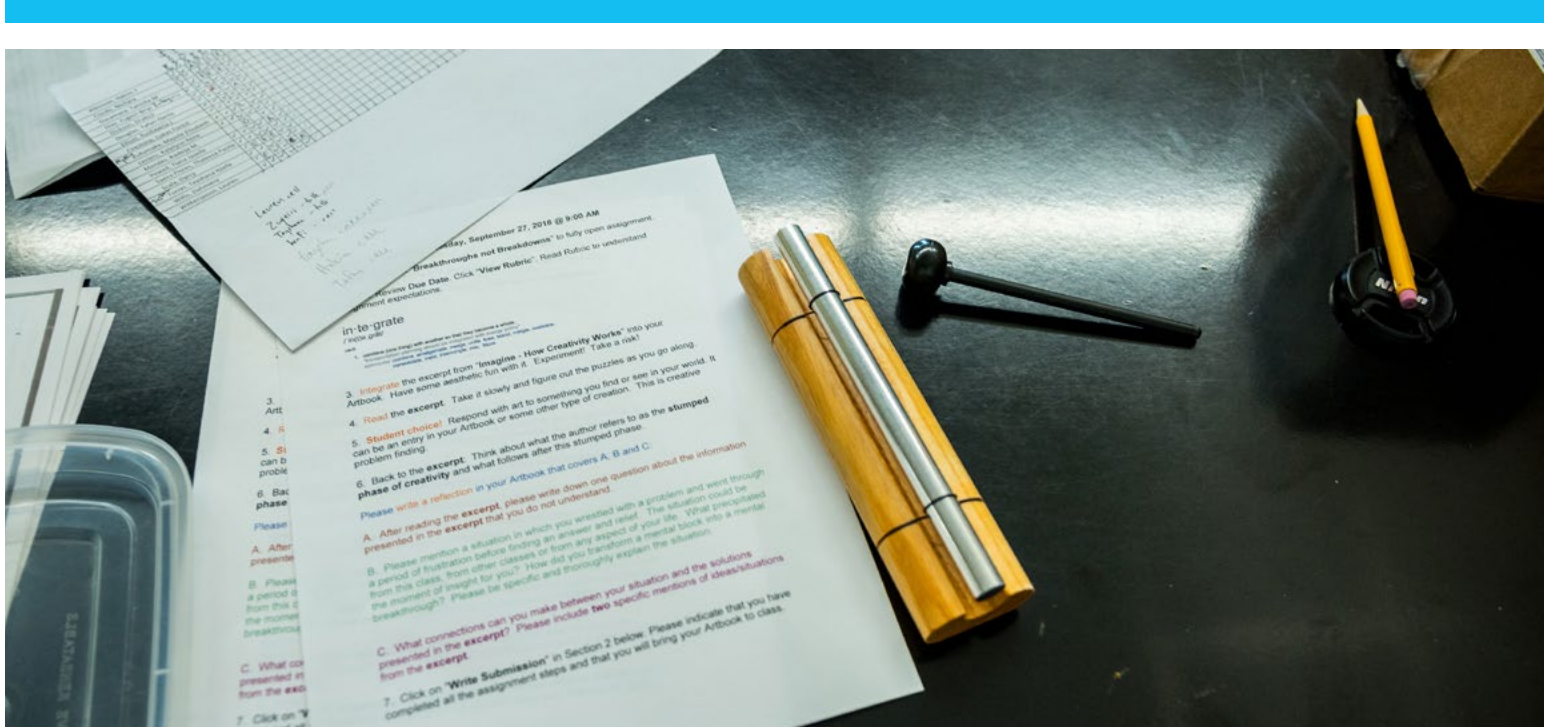

We recognize that, for many students, the need for individualized academic and social support are essential to a successful transition to college and beyond. Each Individualized College Plan (ICP) serves as a road map, outlining areas of need and tracking progress throughout the student's college experience.

I really appreciate how College Steps looks at the student as an individual and designs a program specific to their needs. My son sees a future at the college, fulfilling his dream. He feels with College Steps he can achieve it. I do, too.
