

RESEARCH BRIEF

**Student Achievement Criteria at NOVA:
Retention by Select Student Characteristics**

Northern Virginia Community College (NOVA) is deeply committed to the values of student access and student success. NOVA demonstrates this commitment by using evidence-based decision making to improve opportunities for students to succeed. After a long-standing history of evaluating outcomes related to retention, graduation, and other evolving priorities, NOVA refocused efforts in 2019 on a more comprehensive evaluation of eight critical measures of student achievement, which are as follows: 1) College Readiness; 2) Enrollment; 3) Course Success; 4) Retention; 5) Graduation; 6) Transfer; 7) Job Placement; and 8) Licensing Exams.¹

In This Brief

This Brief highlights NOVA's performance on the Retention criteria. Retention is defined as the rate at which students re-enroll or successfully complete their program by subsequent semesters. NOVA tracks two measures of retention: the fall-to-spring retention rate and the fall-to-fall retention rate. For each measure of retention, this Brief disaggregates data by select student characteristics. Disaggregation by these characteristics allows the college to identify where achievement gaps exist within its eight student achievement criteria.

Key Findings

- **Fall-to-Spring Retention:** Among the Fall 2018 first-time in college, program placed cohort, the following student groups had fall-to-spring retention rates that were lower than their respective counterparts and the College overall: students who identified as Black/African American, Hispanic/Latino, white, or another race or ethnicity; male students; older students; non-Pell Grant recipients, and students who were not the first in their family to attend college.
- **Fall-to-Fall Retention:** Among the Fall 2017 first-time in college, program placed cohort, the following student groups had fall-to-fall retention rates that were lower than their respective counterparts and the College overall: students who identified as Black/African American or white; male students; and older students.

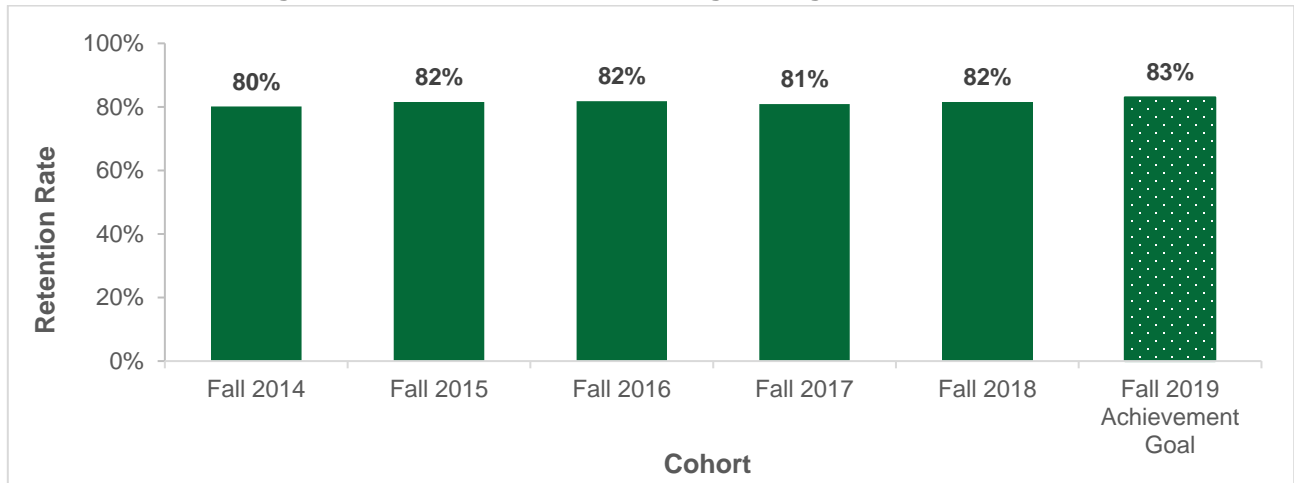

¹ For more information, see *Report 29-20: Student Achievement Criteria at NOVA: Comprehensive Evaluation Report 2020*.

Section 1. Overall Retention Rate

Fall-to-Spring Retention

The fall-to-spring retention rate is defined as the percentage of first-time in college, program placed students who first enrolled in the fall and either re-enrolled or successfully completed their program by the following spring semester. Among the Fall 2018 cohort, 82 percent of students returned to NOVA for a subsequent spring semester.

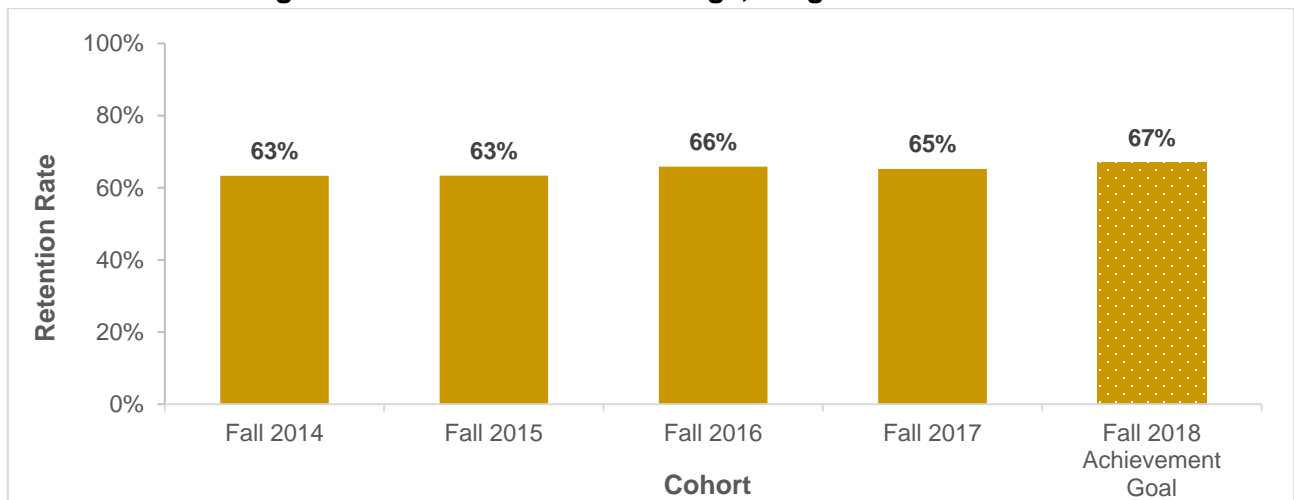

Figure 1. Overall Fall-to-Spring Retention Rate: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Fall-to-Fall Retention

The fall-to-fall retention rate is defined as the percentage of first-time in college, program placed students who first enrolled in the fall and either re-enrolled or successfully completed their program by the following fall semester. The fall-to-fall retention rate is substantially lower than the fall-to-spring retention rate at NOVA. Among the Fall 2017 cohort, approximately 65 percent of students returned to NOVA for a subsequent spring semester.

Figure 2. Overall Fall-to-Fall Retention Rate: Fall 2014 through Fall 2017 First-Time in College, Program Placed Cohorts

Section 2. Fall-to-Spring Retention by Select Student Characteristics

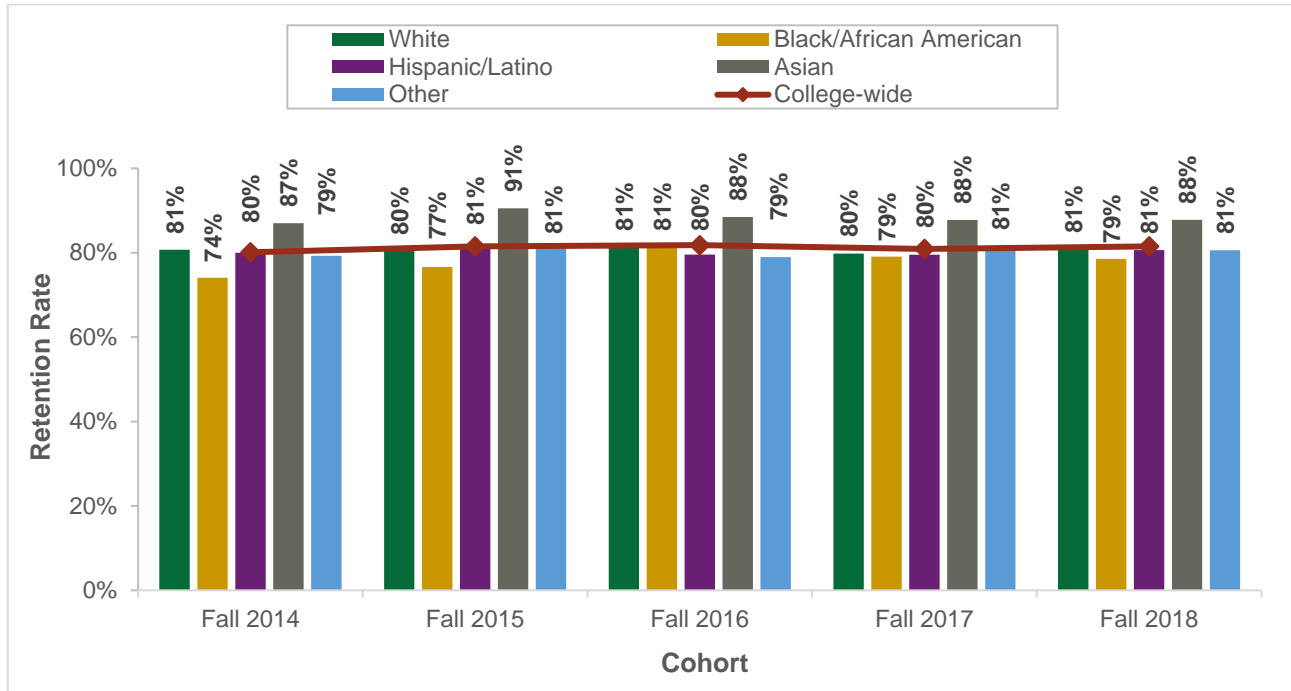

This section presents data regarding the fall-to-spring retention rate of first-time in college, program placed students at NOVA. The fall-to-spring retention rate is defined as the percentage of first-time in college, program placed students who first enrolled in the fall and re-enrolled or successfully completed their program by the following spring semester. Fall-to-spring retention rates are disaggregated by the following student characteristics: race/ethnicity, gender, age group, Pell Grant status, and first generation status.

Fall-to-Spring Retention Rate by Race/Ethnicity

Among the Fall 2018 cohort of first-time in college, program placed students, students who identified as Asian had the highest fall-to-spring retention rate (88 percent).

Conversely, the other four racial/ethnic groups fell below the College-wide fall-to-spring retention rate of 82 percent. Students who identified as Black/African American had the lowest fall-to-spring retention rate (79 percent), followed by white students, Hispanic/Latino students, and students of another race or ethnicity (81 percent each).

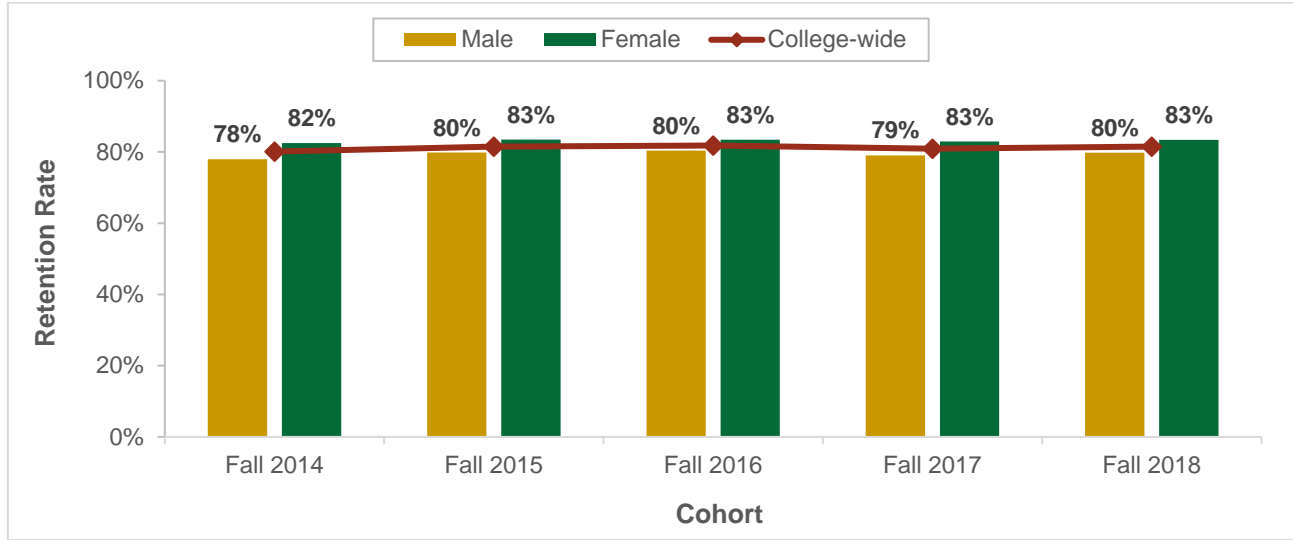

Figure 3. Fall-to-Spring Retention Rate by Race/Ethnicity: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Fall-to-Spring Retention Rate by Gender

Among the Fall 2018 cohort of first-time in college, program placed students, female students had a higher fall-to-spring retention rate than male students (83 versus 80 percent). While the fall-to-spring retention rate for female students was above the College-wide average of 82 percent, the retention rate of male students fell below the College-wide average.

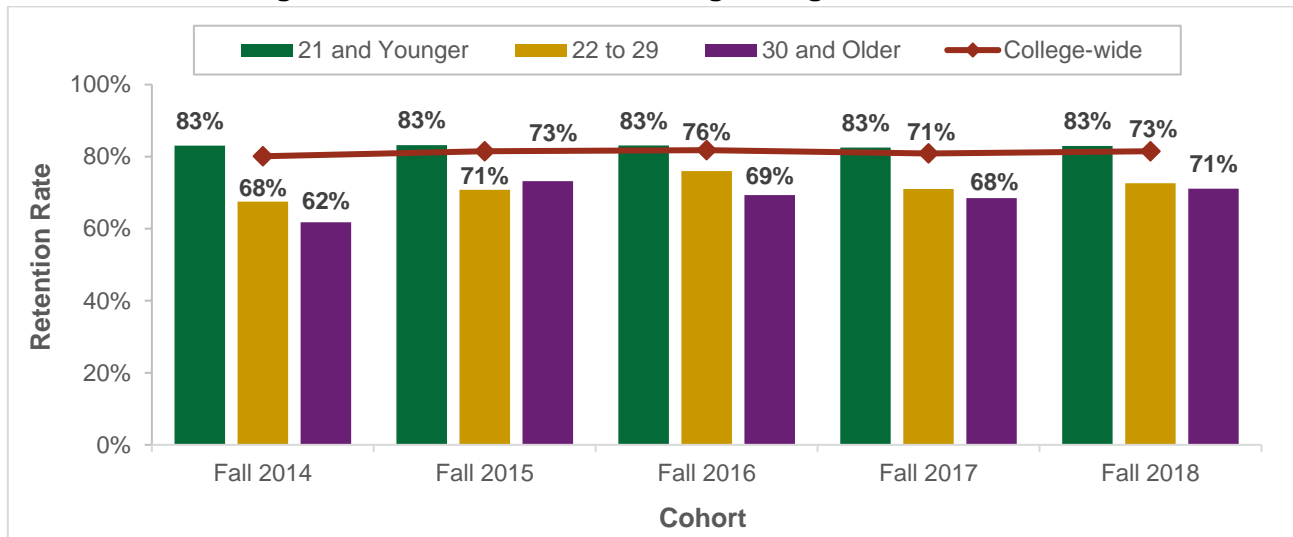

Figure 4. Fall-to-Spring Retention Rate by Gender: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Fall-to-Spring Retention Rate by Age Group

Among the Fall 2018 cohort of first-time in college, program placed students, students aged 21 and younger had a higher fall-to-spring retention rate than older students (83 percent versus 73 percent for students aged 22 to 29; and 71 percent for students aged 30 and older). The fall-to-spring retention rate for both older age groups fell below the College-wide average of 82 percent.

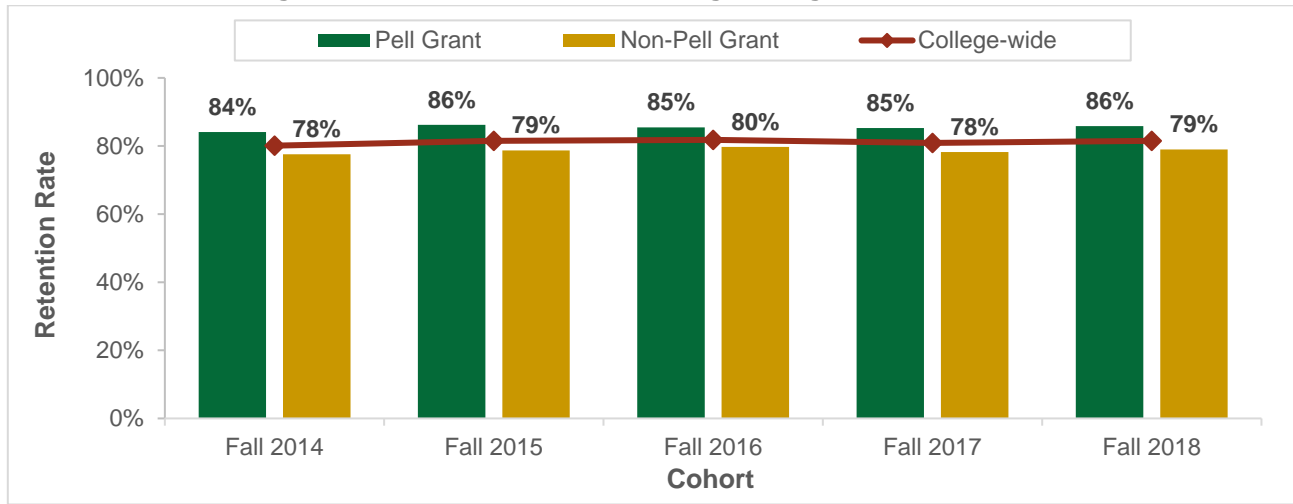

Figure 5. Fall-to-Spring Retention Rate by Age Group: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Fall-to-Spring Retention Rate by Pell Grant Status

Among the Fall 2018 cohort of first-time in college, program placed students, students who received a Pell Grant had a higher fall-to-spring retention rate than non-Pell Grant recipient students (86 versus 79 percent). While the fall-to-spring retention rate for Pell Grant recipients was above the College-wide average of 82 percent, the retention rate of non-Pell Grant recipients fell below the College-wide average.

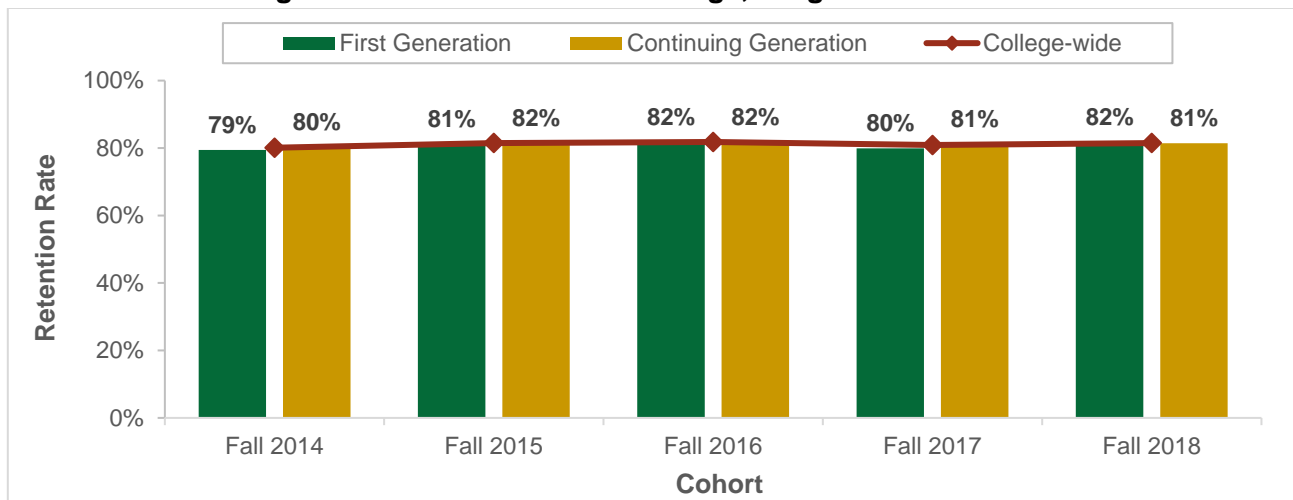

Figure 6. Fall-to-Spring Retention Rate by Pell Grant Status: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Fall-to-Spring Retention Rate by First Generation Status

Among the Fall 2018 cohort of first-time in college, program placed students, first generation students had a slightly higher fall-to-spring retention rate than continuing generation students (82 versus 81 percent). The fall-to-spring retention rate for first generation students was the same as the College-wide average, but the fall-to-spring retention rate for continuing generation students was slightly lower than the College.

Figure 7. Fall-to-Spring Retention Rate by First Generation Status: Fall 2014 through Fall 2018 First-Time in College, Program Placed Cohorts

Section 3. Fall-to-Fall Retention by Select Student Characteristics

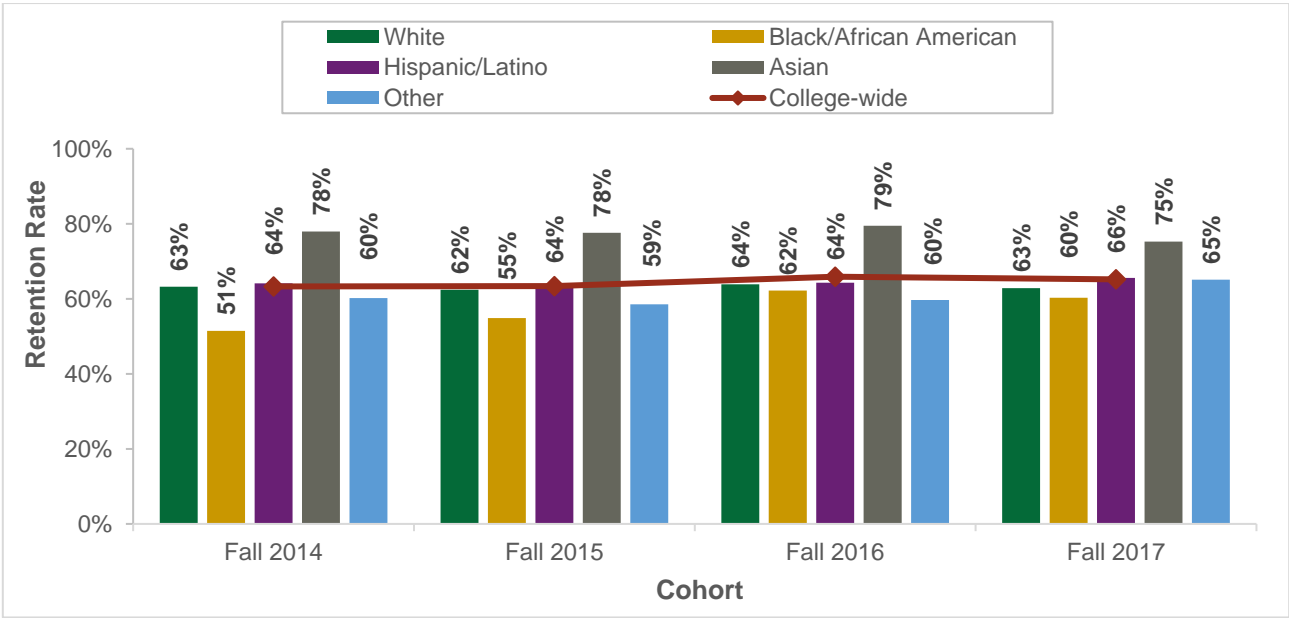

This section presents data regarding the fall-to-fall retention rate of first-time in college, program placed students at NOVA. The fall-to-fall retention rate is defined as the percentage of first-time in college, program placed students who first enrolled in the fall and re-enrolled or successfully completed their program by the following fall semester. Fall-to-fall retention rates are disaggregated by the following student characteristics: race/ethnicity, gender, age group, Pell Grant status, and first generation status.

Fall-to-Fall Retention Rate by Race/Ethnicity

Among the Fall 2017 cohort of first-time in college, program placed students, students who identified as Asian had the highest fall-to-fall retention rate (75 percent), which exceeded the College-wide average (65 percent). Students who identified as Hispanic/Latino or as another race or ethnicity also had fall-to-fall retention rates that were at or above the College-wide average (66 and 65 percent, respectively).

Conversely, students who identified as Black/African American had the lowest fall-to-fall retention rate (60 percent), followed by white students (63 percent). The fall-to-fall retention rate of both groups fell below the College-wide average of 65 percent.

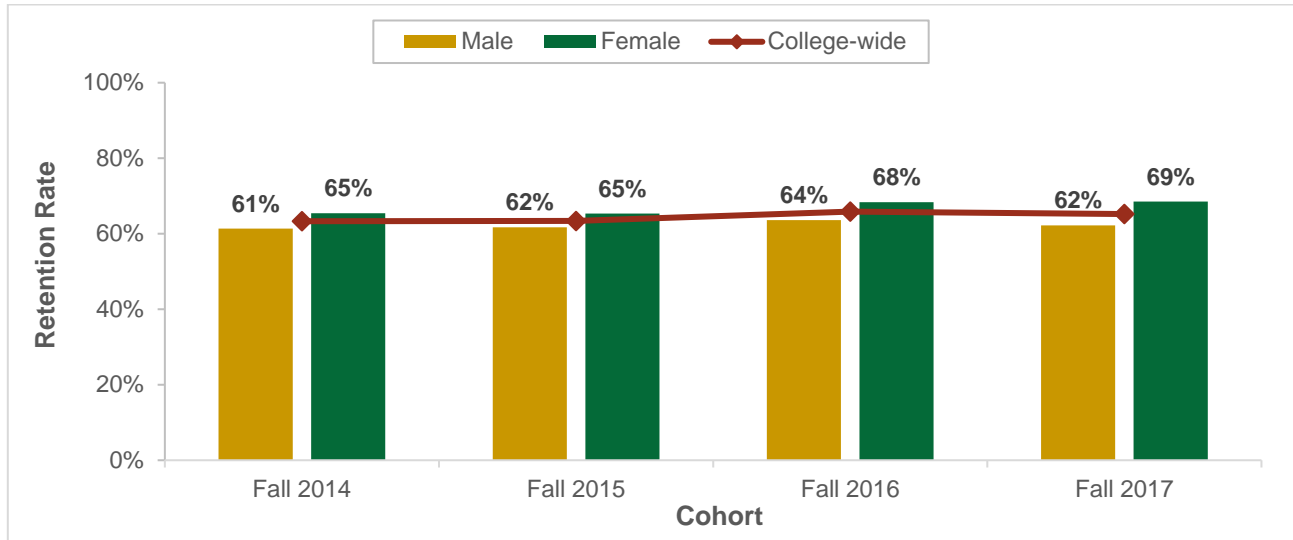

Figure 8. Fall-to-Fall Retention Rate by Race/Ethnicity: Fall 2014 through Fall 2017 First-Time in College, Program Placed Cohorts

Fall-to-Fall Retention Rate by Gender

Among the Fall 2017 cohort of first-time in college, program placed students, female students had a higher fall-to-fall retention rate than male students (69 versus 62 percent). While the fall-to-fall retention rate for female students was above the College-wide average of 65 percent, the fall-to-fall retention rate of male students fell below the College-wide average.

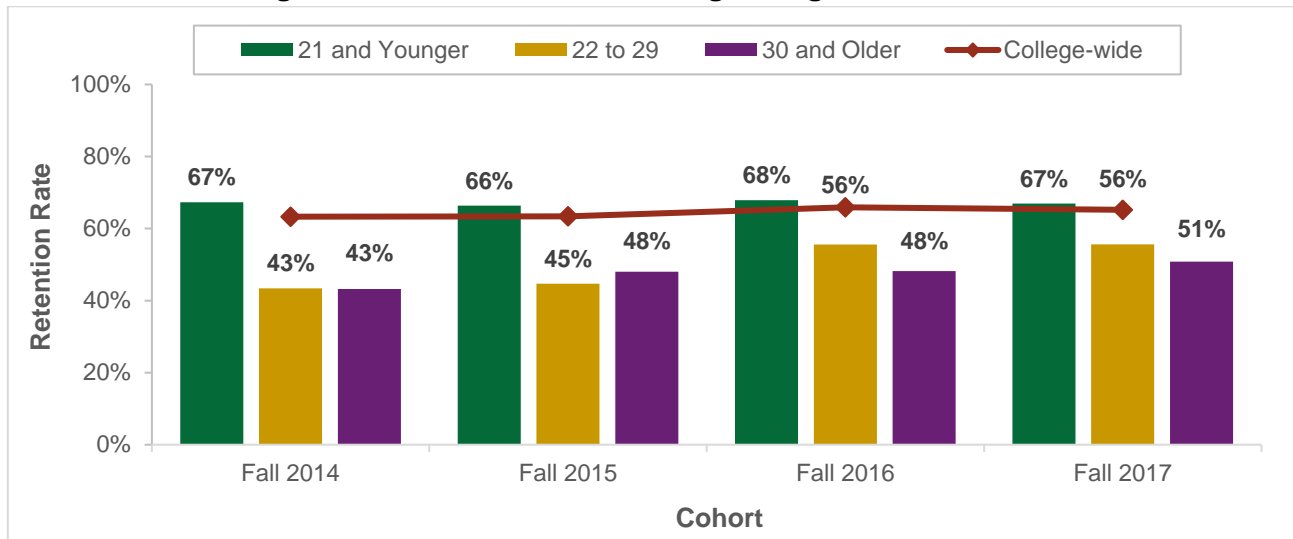

Figure 9. Fall-to-Fall Retention Rate by Gender: Fall 2014 through Fall 2017 First-Time in College, Program Placed Cohorts

Fall-to-Fall Retention Rate by Age Group

Among the Fall 2017 cohort of first-time in college, program placed students, students aged 21 and younger had a higher fall-to-fall retention rate than older students (67 percent versus 56 percent for students aged 22 to 29; and 51 percent for students aged 30 and older). The fall-to-fall retention rate for both older age groups fell below the College-wide average of 65 percent.

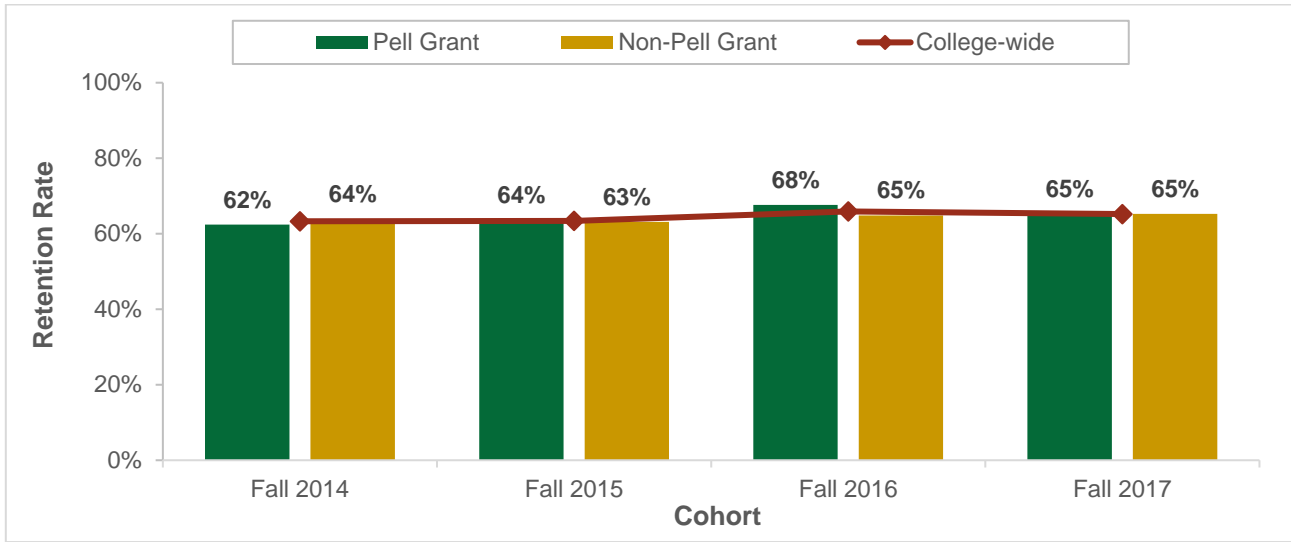

Figure 10. Fall-to-Fall Retention Rate by Age Group: Fall 2014 through Fall 2017 First-Time in College, Program Placed Cohorts

Fall-to-Fall Retention Rate by Pell Grant Status

Among the Fall 2017 cohort of first-time in college, program placed students, students who received a Pell Grant and non-Pell Grant recipients had similar fall-to-fall retention rates (65 percent each). Both groups were consistent with the College-wide fall-to-fall retention rate which was also 65 percent.

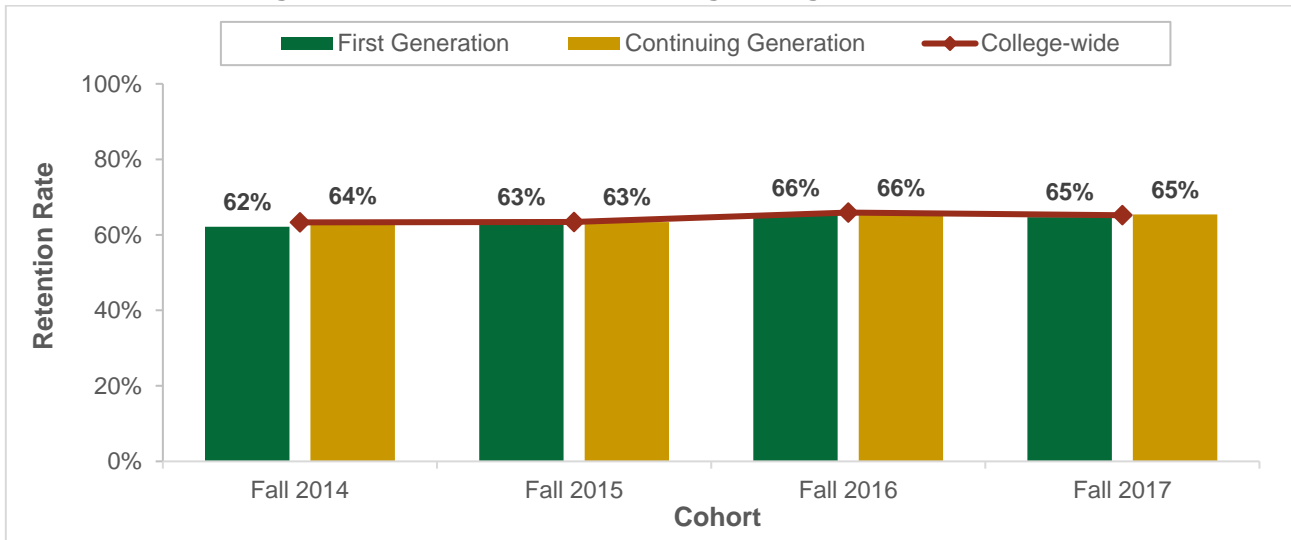

Figure 11. Fall-to-Fall Retention Rate by Pell Grant Status: Fall 2014 through Fall 2017 First-Time in College, Program Placed Cohorts

Fall-to-Fall Retention Rate by First Generation Status

Among the Fall 2017 cohort of first-time in college, program placed students, first generation and continuing generation students had similar fall-to-fall retention rates (65 percent each). Both groups were consistent with the College-wide fall-to-fall retention rate which was also 65 percent.
