

**NOVA COLLEGE-WIDE COURSE CONTENT SUMMARY
DMS 256 - ECHOCARDIOGRAPHY CASE STUDY REVIEW (1 CR.)**

Course Description

Presents weekly echocardiography case studies by faculty and students for interpretation and pattern recognition. Lecture 1 hour per week.

General Course Purpose

The purpose of this course is to have faculty and students present interesting echocardiography case study topics that are acquired at clinical affiliates for review with fellow classmates and faculty.

Course Prerequisites/Co-requisites

The student must satisfactorily complete all previous sonography courses with a grade of "C" or better.

Course Objectives

Upon completing the course, the student will be able to:

- Acquire case studies for review.
- Prepare case studies for review.
- Present and discuss case studies.
- Participate in case study discussions.
- Develop concise, clear communication skills.

Major Topics to be Included

- a. Review echocardiography case studies.
- b. Present and discuss echocardiography anomalies.
