

Using CART Captions with Zoom

- 1) The student/participant will be given two links: a Zoom link from the teacher/host (to get into the class/meeting) and a textcast link from the Interpreter Services Office (to get captions)
- 2) When it's time for the class/meeting, the student/participant joins the Zoom class/meeting – the teacher or host will provide this link.
- 3) The student/participant clicks on the textcast link – this will be provided by the Interpreter Services Office. This will open a new window in the student/participant's browser – the captions will be visible in this window.
- 4) The student/participant will be sent a transcript at the end of class (within 24 hours of the class ending). The textcast link does not have to be opened to get the transcript – the transcript will be sent whether the link is opened or not.
