PROGRAM DETAILS

The Ethical Hacking, Cybersecurity, and Criminology Bootcamp is a hybrid program that will take place over 8 weeks taught at the UK Centre for Excellence in Cyber Security and the School of Business, Law, and Social Sciences at Abertay University, Scotland. The first four weeks will take place virtually and the second four weeks will take place in Dundee, Scotland. The Ethical Hacking portion of the program will include both Ethical Hacking as well as an introduction to C++ programming. The aim of this course is to provide the student with knowledge of the issues and practicalities involved in securing computer systems and the framework within which computer security specialists would need to operate. The Criminology course will provide students with an introduction to the criminal justice in the UK and include comparative focus between the US and the UK. It will examine how the criminal justice system operates, its key agencies and processes, as well as their relationship with the wider institutions, structures and issues in modern society, including Cyber Crime, the role of the victim and wider debates and theories on crime and justice in the two countries.
