Connecting to Wi-Fi Network with Windows 7

Students

1. Click on the WiFi icon in the system tray in the lower right corner. You will see a list of available wireless networks (Make sure that your wireless network card is enabled). Click Directory and the “Connect” button. The NOVAwifi network can be connected to using the same method and login credentials.

2. A login dialog window will appear. Enter your MyNova login information as seen below. Press “OK”.
3. If you entered a valid username and password a security dialog window will appear. Click “Connect” to accept the security certificate and connect to the network.
4. These windows will disappear and the WIFI icon will appear filled in indicating your signal strength. Click the WIFI icon and Directory network will appear bold and be marked, ‘Connected’.
