‘Android’ mobile devices may vary in the way they connect to wireless networks. Below is a walkthrough using a common WiFi configuration mode for Android devices.

1. Tap ‘settings’ (You may need to drag down from the top of the screen to see this icon)
2. Tap “Wi-Fi” in Settings
3. Tap ‘Directory’
4. Enter your MyNOVA 'Username' and MyNOVA 'Password'. Click 'Connect'.
5. When the above information is entered correctly you will be connected to the Directory Wireless network
