

Teaching Goals Inventory, Self-Scorable Version Instructions

Purpose: The Teaching Goals Inventory (TGI) is a self-assessment of instructional goals. Its purpose is threefold: (1) to help college teachers become more aware of what they want to accomplish in individual courses; (2) to help faculty locate Classroom Assessment Techniques they can adapt and use to assess how well they are achieving their teaching and learning goals; and (3) to provide a starting point for discussions of teaching and learning goals among colleagues.

Directions: Please select ONE course you are currently teaching. Respond to each item on the inventory in relation to that particular course. (Your responses might be quite different if you were asked about your overall teaching and learning goals, for example, or the appropriate instructional goals for your discipline.)

Please rate the importance of each of the fifty-two goals listed on the TGI to the specific course you have selected. Assess each goal's importance to what *you* deliberately aim to have your students accomplish, rather than the goal's general worthiness or overall importance to your institution's mission. There are no "right" or "wrong" answers; only personally more or less accurate ones.

For each goal, circle only one response on the 1-to-5 rating scale. You may want to read quickly through all fifty-two goals before rating their relative importance. In relation to the course you are focusing on, indicate whether each goal you rate is:

- | | |
|--------------------|--|
| (5) Essential | a goal you always/nearly always try to achieve |
| (4) Very important | a goal you often try to achieve |
| (3) Important | a goal you sometimes try to achieve |
| (2) Unimportant | a goal you rarely try to achieve |
| (1) Not applicable | a goal you never try to achieve |
