# QUICK FACTS ABOUT NOVA: TRANSFERS

## Impact of Dual Enrollment Headcount on NOVA Transfers

- NOVA has seen an increase in its dual enrolled students in recent years, that is, high school students enrolled at NOVA for concurrent credit.
- Many students who participate in dual enrollment while in high school enroll directly in a four-year institution upon high school graduation.
- When evaluating the recent increase in the annual number of students who transfer to four-year institutions, some of this increase can be attributed to the increase in students who were dual enrolled in high school and then entered a four-year institution upon graduation from high school or within a few years of being dual enrolled at NOVA.
