Great News! Your class is a lecture capture class. This means that there will be recordings of classroom-based activities available through Blackboard for viewing away from the classroom. Your professor may ask you to view the recording before class as “homework” or after class as “review.” You will be able to view the recordings on any device, which allows you to access your Blackboard account. “Any time, any where!” You can go back to view as many times as you wish.

In order to view, search, and take notes on the lecture capture sessions, first you need to log-in to Blackboard using your NOVA log-in and password.

Click on “MyNOVA” and then log-in

After you log-in, click on Blackboard.

Open your course in the box with courses on the right hand side of the launch window.

When you open your course, you will need to click on tools in the course tools.
At this time you should be able to see all of the lecture capture sessions that your professor has made available. Choose the one that you want to access and Panopto will open in a web browser.

You can view the video from the beginning. You can search using the screen shots bar at the lower right or the middle tab on the left under the video screen. You can take notes by typing in the note text box at the lower left and those will be searchable after you submit them. If you click on the info tab, the PPT
Slides will be listed in order and you can scroll thru to the part of the lecture you wish to review. Thanks to your professor and the college, you can now view the lecture capture in preparation for a class and as a review after class. We hope that you enjoy this new tool.

For more information, contact us at IS&D in Bisdorf AA337 on the Alexandria Campus or email at AL_IS&D@nvcc.edu

You can also watch the Panopto informational video at http://demo.hosted.panopto.com/Panopto/Pages/Viewer/Default.aspx?id=aa094585-d548-47e2-9102-26de4631f68a

This is what the lecture capture looks like when the primary source is the computer screen and not a power point slide. Your professor could use the ELMO document camera, a laptop, an iPad, or the PC from the classroom. We hope you find this to be a useful tool.
