Image Editing with FotoFlexer

© Copyright 2014: Northern Virginia Community College - Woodbridge Open Computer Lab
Disclaimer: All screenshots in this document are taken from the following website: www.fotoflexer.com
**Introduction:** FotoFlexer is an online digital photo editing tool enabling you to edit your pictures in an easy and simple way.

**Uploading Images**
- To get started, visit [fotoflexer.com](http://fotoflexer.com)
- Click on **Upload Photo → Upload**
- Browse to your image and click **Open**

Once the image is uploaded, you should see the following tabs above the image:

**Basic Tab:** Following are the options under Basic Tab

- **Auto Fix:** Makes automatic adjustments and corrections to your image
- **Fix Red Eye:** Removes red eye from your image. To apply this option, click on the option first and then click the center of the eye
**Crop:** Crops (removes some parts of) the image

**Image Source:**
www.bhmpics.com/beauty_girl_cartoon-wallpapers.html

**Copy Region:** Using this option you can copy any part of the image

**Resize:** This button is used to change the size of your image, it makes the picture bigger or smaller based on your preference
**Rotate:** Turns the images upwards or downwards

**Before**

![Before Image 1](image1)

**After**

![After Image 1](image2)

**Flip:** Switches the position of the picture from left to right or right to left

**Before**

![Before Image 2](image3)

**After**

![After Image 2](image4)

**Adjust:** Adjusts the Hue, Saturation and Lightness. Drag the slider to left or right to make the desired adjustments.

<th>Beautify</th>
<th>Distort</th>
<th>Layers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Filter</td>
<td>Decorate</td>
<td>Animation</td>
<td>Beautify</td>
<td>Distort</td>
<td>Layers</td>
</tr>
<tr>
<td>Pro</td>
<td>Cross Process</td>
<td>Lomish</td>
<td>Super Pixelate</td>
<td>Comic</td>
<td>Blur Edges</td>
</tr>
</tbody>
</table>

**Decorate Tab**

**Stickers:** Adds stickers to your image

![Stickers Image]

**Text:** Adds text to your image

![Text Image]

**Glitter Text:** Adds glitter text to your image

![Glitter Text Image]
**Draw:** Enables you to draw shapes on your picture

![Draw](image1)

**Erase:** Enables you to erase unwanted content of your image

![Erase](image2)

**Insert-A-Face:** Inserts the face of your image on another image. Use the scale, rotate, and move options to adjust the position of the face.

![Insert-A-Face](image3)
**Borders:** Adds borders to your image

**Posters:** Allows you to create a poster from your image as well as add a title and body content to your picture. This option is great for creating flyers.

**Animations Tab:** Allows you to add animated objects to your picture

Tip: Try applying "Effects" and "Distortions" to your animations.

**Beautify Tab:**

**Smooth:** Used for smoothing parts of your image. This can be used to hide flaws of your image

**Sharpen:** Used for sharpening parts of your image to make the details appear more clearly

**Fix Blemishes:** Removes blemishes from your image

**Smooth Wrinkles:** Reduces the wrinkles from your image
**Distort Tab:** The options on this tab allows you to twirl, bulge, pinch, stretch, or squish your image. Click on the desired option then click on a part of your image to see the effects.

**Layers Tab:** The options on this tab allows you to add layers to your image. Layers enables you to combine multiple images together into one single file. You can also adjust the opacity (transparency) of your image from this section.

**Geek Tab:** Use this tab to apply advanced adjustments to your image such as smart resizing, smart recoloring, and many other options.
