Connecting to NOVA Wi-Fi: Windows 7
1. Open the Control Panel, select View network status and tasks

2. Click on set up a new connection or network

3. Click on manually connect to a wireless network.

4. Enter NOVA in the Network Name text box and set the Security Type to 802.1x. Next, check the Connect even if network is not broadcasting box then click Next.

   - On the next screen, click on Change Network Settings.

5. Check Connect even if network is not broadcasting box then click on the Security TAB.

6. Click on the drop down menu and select PEAP, then click on Settings.
7. Uncheck the **2 items** circled in red then click on **Configure**.

9. Make sure user authentication is selected for **Authentication Mode**.
   Keep clicking on **OK** until you come back to the **Manage Wireless Screen**.

8. Uncheck **automatically use my Windows Logon**. Click on **OK** 2 times. Then click on **Advanced Settings** button.

10. On the lower right, click **on Additional information is required to connect to NOVA** message.

11. Enter your LAN account username and password. (Note that your LAN account credentials are different than that of your MyNOVA account. Please contact the IT Helpdesk (703-426-4141) to obtain your LAN account information.)
