Connecting to NOVA Wi-Fi: Windows Vista
1. Open the control panel, Click on View network status and tasks.

2. On the left side, click on Set up a connection or network. Then click on Connect to a network.

3. Select manually connect to a wireless network.

4. Enter NOVA in the network name text box and set the Security Type to 802.1x. Make sure that both boxes circled in red are checked and click Next.

5. Click on Change connection settings.
6. On the **connection** tab make sure that all three boxes are checked.

7. Click on **Security tab** and make sure that **Security type**, **Encryption type** and **Network authentication method** are setup correctly. Then click on **Settings**.

8. Uncheck the **automatically use my Windows logon name and password** box and click OK.

9. Click on **Additional information is required to connect to NOVA** on the lower right corner of your desktop.

10. Enter your LAN account username and password. (Note that your LAN account credentials are different than that of your MyNOVA account. Please contact the IT Helpdesk (703-426-4141) to obtain your LAN account information.)
